### 3. **Google for Startups**[startup.google+2](#)

- **Activity:** Multiple locations; rolling
- **Recognition:** Google brand but NOT direct funding (credits-based)[\[codeua\]](#)
- **Note:** Credit-based model, not cash

## TIER G: Specialized/Less Widely Known (Still Active)

### 1. **Founders Fellowship** ⚠️ Limited Information

- **Claim:** \$150k for 5–10%
- **Status:** Needs further verification
- **Activity:** Uncertain

### 2. **Accel Atoms** ⚠️ Limited Public Information

- **Claim:** up to \$500k–\$1M
- **Status:** Very selective; limited visibility
- **Note:** Requires Accel backing/introduction

### 3. **Afore Capital**[\[linkedin\]](#)

- **Claim:** \$100k–\$500k variable
- **Activity:** Rolling; pre-seed to seed focus

### 4. **Founders, Inc.**[\[reddit\]](#)

- **Status:** Up to \$150k for 5-10% equity
- **Activity:** Rolling applications

## SUMMARY ACTIVITY TABLE

Tier	Recognition Level	# of Programs	Key Characteristic	Funding Range
A	Mega-Active/Household Names	4	Tier-1 backing; massive scale	\$500k-\$1M
B	Elite Pre-Seed	6	Highly selective; strong networks	\$250k-\$1M
C	Highly Selective Specialists	5	Extreme selectivity; category leaders	\$500k-\$1M
D	Strong Regional/Global	5	Consistent activity; geographic focus	€50k-\$200k
E	Specialized/Niche Leaders	4	Sector/tech-focused; known in community	\$100k-\$500k
F	Emerging/Moderately Active	3	Growing recognition; selective	\$100k-\$1M
G	Specialized/Lower Visibility	3+	Variable; limited public information	\$50k-\$500k

## KEY CORRECTIONS SUMMARY

### Critical Errors Requiring Immediate Updates

1. **Y Combinator Structure:** NOT a single \$500k check. It's \$125k post-money + \$375k uncapped MFN SAFE that converts at your next round. This is materially different for dilution calculations.[rebelfund+2](#)

2. **Google for Startups:** Does NOT provide direct cash funding. You get \$100k-\$350k in cloud credits, not cash investment. This is a mentorship + credits program, not a cash accelerator.[startup.google+1](#)
  3. **Techstars New Pricing:** Updated in April 2025 from \$120k to \$220k, with new two-component structure. Existing information may reference old terms.[techjournal+1](#)
  4. **a16z Speedrun Increased:** Now \$1M (up from previous \$750k). Earlier sources may cite outdated figures.[mobidictum+1](#)
- 

## Important Clarifications

1. **Berkeley SkyDeck:** Now offers \$200k for 7.5% (more recent update than historical \$100k+\$100k structure)[xraise+1](#)
  2. **Antler:** €200k package structure (\$100k equity + €100k SAFE) is more complex than simple "€100k for 10%"[antler+1](#)
  3. **Soma Capital:** Shows significant flexibility—not just \$100k but up to \$1M depending on track record[grahamwalker+1](#)
  4. **500 Global:** \$150k is BEFORE the \$37.5k program fee. Net to founder is \$112.5k. Important for real available capital.[every+1](#)
  5. **Startup Wise Guys:** €65k often includes both cash and program components; net cash varies[vc4a+1](#)
  6. **Sequoia Arc:** Range is \$500k-\$1M, not fixed \$1M. Terms vary by cohort and founder profile.[linkedin+1](#)
  7. **NEO:** Includes 1.5% common stock PLUS uncapped SAFE (two-layer structure)[openvc+1](#)
  8. **LAUNCH:** Only 7 companies per cohort (more selective than your list implies)[launch+1](#)
- 

## RANKINGS BY ACTIVITY LEVEL (Chronological, Most to Least Active)

### MOST ACTIVE (2025-2026 Focus)

1. **Y Combinator** — 4 cohorts/year; ~1,000 annual companies
2. **Techstars** — Multiple global cohorts; 50+ programs
3. **500 Global** — Rolling admissions; continuous investment
4. **a16z Speedrun** — 3-4 cohorts/year; \$100M+ deployed
5. **Entrepreneur First** — Multiple global cohorts
6. **Betaworks** — 2 camps annually; high-quality focus
7. **Seedcamp** — Continuous European pipeline
8. **Sequoia Arc** — 2-3 cohorts/year
9. **LAUNCH** — Rolling quarterly cohorts
10. **Greylock Edge** — Year-round rolling program

[Continued in tiers B-G above...]

## FINAL VERDICT ON YOUR LIST

✓ **Accuracy Score: 73/100**

- **Correct information:** 27 programs verified accurately
  - **Outdated/needs update:** 7 programs (Y Combinator, Techstars, a16z Speedrun, Berkeley SkyDeck, Antler, Google for Startups, Soma Capital)
  - **Minor clarifications needed:** 3 programs (500 Global net vs gross, NEO equity structure, LAUNCH cohort size)
  - **Unverified/needs research:** 3 programs (Founders Fellowship, Accel Atoms, Afore Capital — limited public data)
- 

## RECOMMENDATIONS

1. **Update Y Combinator immediately** — the two-SAFE structure is materially different for dilution
2. **Remove or clarify Google for Startups** — it's not a funding accelerator, it's a credits/mentorship program

3. **Note that Techstars changed pricing in April 2025** — previous sources show \$120k
  4. **Add date qualifiers** — many programs update terms annually; cite "as of January 2026"
  5. **Separate "funding" from "total package value"** — many programs include \$500k+ in credits that aren't equivalent to cash
  6. **Verify Founders Fellowship, Accel Atoms, Afore Capital** — these have limited public information beyond a few mentions
-
